

Managed Detection and Response

Transcript

00:00:00:00 - 00:00:34:20

VOICEOVER (FEMALE):

Cyberattacks are constantly trying to access and exploit your business information. The attacks are growing in number, sophistication, and impact. You need to find and stop cyberattacks every day. You need rapid threat identification. You need richer insights. You need cyber monitoring and response technology driven by human based responses to have the confidence in your managed detection and response provider to protect your key assets with a full suite of managed security services.
