## Success stories

### Client challenge

A global manufacturer with operations in six countries faced slow, manual financial consolidations, relying on fragmented spreadsheets and multiple currencies. Their monthly close process was lengthy and inefficient, leading to data silos, compliance risks, and limited visibility. The organization needed a unified, scalable solution to streamline consolidations, improve data quality, and support future growth.

### Approach

Grant Thornton partnered with the client to implement OneStream as a single financial platform. The project automated and standardized consolidations, migrated legacy data, and enabled real-time reporting. Business processes were harmonized, compliance was ensured, and extensive user training supported adoption. The phased rollout began with consolidations and established a foundation to support future expansion of the OneStream platform to include planning and budgeting, account reconciliations and demand forecasting with AI.

### Value realized

By reducing the financial close time by half, the deployment delivered measurable savings and improved operational performance. The organization now benefits from accurate, real-time financial data, standardized reporting, and improved decision-making. Teams are empowered to focus on strategic activities, and the new platform supports ongoing business growth and advanced financial planning.

## Award-winning excellence

### OneStream's finance transformation award

Grant Thornton was honored with **OneStream's prestigious "Finance Transformation Award"**. This recognition highlights Grant Thornton's ability to drive measurable outcomes through innovative finance solutions, helping clients modernize and optimize their financial operations. This underscores our ability to deliver measurable outcomes through innovative finance solutions—empowering clients to modernize and optimize their financial operations.
